

SUPERSONIX®

The Fastest Hand-Held Duplicator Available!

Clone hard drives at blazing speeds approaching 6GB/min.

SATA/IDE Support

Firewire compatibility

Intuitive Wizard feature steps users through key operations

Support for SAS hard drives available with optional adapter

The new Logicube SuperSonix® hard disk drive duplicator, the second generation of Logicube's popular Sonix®, is a compact and portable cloning solution. A full color touch screen provides an intuitive interface, and support for SATA/IDE/USB/Firewire makes the SuperSonix an extremely versatile duplicator. Faster than software-based cloning the SuperSonix saves time and resources for all your duplicating tasks including software updates and new PC rollouts. The hand-held SuperSonix provides the convenience of on-site as well as "on the bench" duplication. This feature-packed solution is simple and easy to use, and novice users will appreciate the intuitive "wizard" function that steps them through key cloning operations. Logicube delivers dependable, future-focused solutions that meet the demanding requirements of IT departments around the world.

FEATURES

- Single target hard drive to hard drive duplication
- Built-in support for SATA and IDE drives
- Support for SAS drives available with optional adapter. Supports SAS to SAS, SAS to SATA/IDE cloning in Mirror mode
- Built-in USB and firewire connectivity
- Support for eSATA drives (with optional cable) and 1.8" microSATA drives (with optional cable)
- Supports Solid State drives
- Advanced software including CleverCopy™, Selective Partitions™, MirrorCopy™ and MasterManager™
- Support for verification of cloned drive using MD5 signature of target drive
- Supports laptop cloning with optional Clone Card PRO PCMCIA adapter, 2.5", 1.8" and or ZIF adapters
- Bi-directional data transfer
- Automatically scales FAT and NTFS file systems
- System Compact Flash port for software updates
- Adjusts all necessary target drive structures so target will boot
- Clones all operating systems including Windows™ XP, Windows™ Vista, Linux®, UNIX® and Mac OS®
- Optional support for USB 2.0 acquisition speeds (up to 1.5GB/min) of USB enclosures, USB thumb/flash drives. Requires the purchase of a software key code to activate and the SAS adapter for USB plug-in
